

Dear Sirs: The XM Radio has changed my life in that i can listen to just about any kind of music i wish..or talk radio..and yes even travel updates in some select cities. These services i gladly pay for. The initial reason for purchase was i was TIRED of yelling, screaming car ads one after another..furniture store ads the same method. and the same song over and over again. A lack of decent news and broad weather coverage. When visiting up north we can listen to music or talk radio all the way up the coast where before we attained an lost stations constantly. This year we had Christmas music available the entire trip up and it made the trip much more pleasant. Rather than tone down the ads and not treating the consumer like a complete idiot and rather than finding out what the MAJORITY want to listen too the Broadcasters decide that the Government needs to "PROTECT" them from their own inept selves. Leave Government out of this and let the Private Marketplace decide what they want. There are a lot more pressing matters for the Republican and Democratic Party to deal with then worrying about what i decide to PAY to listen too.
